

## NAC Worldwide Consulting: *TRAINING INSTRUCTORS*

NAC Worldwide Consulting's instructors have nuclear fuel cycle experience in the natural uranium, conversion, enrichment and fabrication markets. The curricula are based on this experience to provide instantly applicable information and analysis to the utility client.

The instructors include:

---

### **DR. GEOFF A. VARLEY**

*Director, Commercial Consulting.* Varley has nearly 30 years of experience in the nuclear industry with NAC and U.K. nuclear fuel services company British Nuclear Fuels plc. At NAC, Varley has managed the company's market analysis, database and consulting activities for European, African and the Near Eastern arenas, and has made major contributions to NAC's technical and engineering consulting activities worldwide. He has expertise in all nuclear fuel cycle sectors, including special emphasis in the enrichment, fuel fabrication and back-end sectors.

---

### **CHRISTOPHER A. RUSCH**

*Senior Consultant.* Rusch has more than 30 years of experience in the nuclear industry. His experience includes management of the nuclear fuel department at Portland General Electric (PGE) where he was responsible for all phases of nuclear fuel procurement, including strategic and tactical planning, bid preparation, supplier and proposal evaluations, contract negotiation and administration, economic analysis, and reload safety evaluations.

---

### **GARY E. LEAMON**

*Senior Consultant.* Leamon is widely known for his incisive studies on the uranium and conversion markets. He has detailed knowledge of the major North American uranium production facilities and has authored numerous works evaluating the terms and pricing provisions in uranium contracts. An expert in technical and commercial aspects of the uranium and conversion markets, Leamon has prepared annual uranium procurement strategies for utilities worldwide.
